Cintiq[®] 21UX

interactive pen display

NATURAL Digital Canvas

The redesigned Cintiq 21UX now includes Wacom's advanced pen sensor technology for the best direct pen-on-screen experience ever. The pen activates with a feather touch to allow creative professionals to work in the most natural and intuitive way.

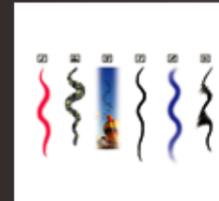

SPACE TO CREATE

With 21.3" of screen real estate and 1600 x 1200 pixel resolution, the Cintiq21 offers plenty of space to design, edit, re-touch, animate and create. Perfect as a main monitor or as part of a dual display set-up.

TOUCH AND TOGGLE

Rear-mounted Touch Strips are conveniently located in back of the Express Keys for easy use by fingers on your non-dominant hand. Use the Touch Strip toggle button to quickly move between the 4 Touch Strip functions: zoom, scroll, canvas rotation, and change brush size.

REAL FEEL

With the upgrade to the new Wacom pen sensor, drawing directly on screen has never felt better or more natural. And, the pen pressure sensitivity has been doubled to 2,048 levels to provide unsurpassed accuracy and enhanced line quality.

PEN PERFORMANCE

The Grip Pen features 2 side switches that can be customized to perform common tasks such as right-clicking, scrolling, and many more. Plus, the high-performance pen recognizes up to 60° of tilt, which allows you to achieve certain effects by simply varying the angle of your stroke.

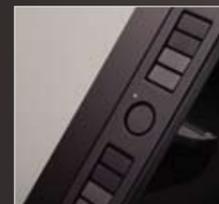

BEST POSITIONS

Creative professionals work in different ways and need the most comfortable tools possible. We have you covered. The versatile stand reclines from 10° to 65° and allows the tablet to rotate 180° in either direction. The unit can be removed from the stand and uses a standard VESA mount.

ACCESSORIZE

A full line-up of accessories is available for the Cintiq 21UX. The Airbrush pen feels like a real airbrush and includes a fingerwheel to control ink flow. The Art Pen emulates brushes, markers and calligraphic pen and can accurately track pen rotation. And, there's many more from which to choose.

AT YOUR CONTROL

The Cintiq 21UX features 16 fully customizable ExpressKeys, with 8 on each side for ambidextrous use. Each ExpressKey can be set as application-specific keyboard shortcuts, or modifier keys. Press the Show Settings key to instantly display your current settings on-screen.

VALUABLE SOFTWARE

Each Cintiq 21UX comes with valuable software from our partners. The bundled software includes Adobe Photoshop Elements, Corel Painter Sketch Pad, Autodesk Sketchbook Express, Nik Color Efex filters, and Wacom Brushes.
